Criteria for Successfully Completing a Module Quiz

The Module Quiz is to be completed individually. These are completed online and are automatically graded. The criteria for successfully completing a Module Quiz is described below.

Note: you may collaborate with another individual. See the [Guidelines for Appropriate Collaboration](#) to prevent committing academic misconduct. You are responsible for all answers submitted; the instructor reserves the right to require an oral examination over the answers submitted to ensure the work is that of the student.

Criteria:

Successful completion of a Module Quiz requires the following conditions be met:

- Quiz is completed by the posted due date.
- 100% of questions are answered correctly. As each question is graded pass/fail, caution should be exercised when answering questions involving numeric computations (the questions account for sources of rounding error, which are not held against you).

When completing the quiz, keep the following in mind:

- You are permitted **3 attempts** on the quiz to obtain a successful completion.
- *Within* each attempt, you may **try each numeric problem 2 times**.
- There is no time limit on the quiz; you may exit the quiz at any time, and it will save your current answers and allow you to resume where you left off.
