Course Portfolio

Due: Friday, February 17, 2023, 11:59 PM

The portfolio is an opportunity to reflect on your learning in the course and communicate that learning to us, the instructors. It will also be used during your meeting with us when setting your grade for the course. Your portfolio should contain three components, described below:

Engagement with Material

Describe your *engagement* with the course readings and the analysis tasks assigned in a paragraph (~100-150 words) You might think about the time spent with readings, your process for working through the assignments, etc.

Reflection on your learning

Revisit the [learning outcomes](#) and reflect upon what you have learned in this course. In a short essay (~600-800 words), select 3 learning outcomes and *demonstrate* what you have learned in these areas by drawing upon the readings, films, lectures, weekly assignments and/or [capstone project](#). In a concluding paragraph you may address anything else that you have learned that is not captured in the outcomes.

Assessment

Evaluate your learning in the course and your progress toward meeting the course objectives. Honestly assess your experience and explain your rationale for the grade in a paragraph (~150-200 words)

Separate groups
